

LNB FEDERAL

ACCELERATING SOLUTION INNOVATIONS

Our products and packaged solutions blend advanced technology with experience in operations across the harshest environments.

CAPABILITY STATEMENT

COMPANY OVERVIEW

LNB Federal Corporation is a U.S. Government contractor providing IT/Cybersecurity services. We deliver mission-critical IT solutions across cybersecurity, software development, enterprise licensing and cloud, modeling and simulation, and cleared professional services, and we build our own products for Government programs.

With an understanding of each agency's mission, LNB Federal selects the right partners, products and people for fast, secure outcomes.

CORE COMPETENCIES

- **Cybersecurity Solutions:** security tools and specialized solutions that protect critical data at every endpoint, sourced through long-term relationships with leading cybersecurity manufacturers.
- **Cybersecurity Maturity Program:** strategy, programs and processes that advance cyber maturity and resilience cost-effectively.
- **Enterprise Licensing and Cloud Services:** Software Enterprise Agreements, service enrollments and FedRAMP cloud solutions for U.S. Government agencies.
- **Software Development:** scaled agile practices, DevSecOps pipelines and open, cloud-native architectures, with security and quality metrics automated in delivery.
- **Digital Battlespace:** C3 and battle management, ISR and electronic warfare, warfighter systems, and COTS modeling and simulation for training.
- **IT Professional Services:** on-demand talent for defense IT projects, including candidates who hold or can obtain security clearances and meet DoD 8570 requirements.

PRODUCT: BELLEROPHON

Flight Test Data Platform. Decodes, searches and analyzes IRIG 106 Chapter 10 flight test recordings (MIL-STD-1553, PCM, ARINC 429, discretes, analog, Ethernet) on servers the customer controls, including air-gapped networks. Reader validated 67 of 67 checks against two independent open-source readers. Ready for authorization with smart card (CAC/PIV) sign-in, role-based access, an audit log, a FIPS mode and a NIST SP 800-53 control mapping. A free evaluation runs in the browser.

DIFFERENTIATORS

- **Mission focus.** Solutions selected for each agency's environment, from enterprise to edge.
- **Manufacturer relationships.** Direct access to leading cybersecurity and defense technology products.
- **Builder and integrator.** In-house software engineering that ships products, not only services, from design and independent validation to secure delivery.
- **Security by design.** Open architectures that keep the Government in control of its data, including products that run on closed and air-gapped networks.
- **Cleared talent.** Candidates who hold or can obtain Top Secret clearances with SCI eligibility, CAC credentials and DoD 8570 certifications.
- **Secure delivery.** Software sent through customer-approved file transfer.
- **Simplified licensing.** Software Enterprise Agreements and FedRAMP cloud enrollments managed end to end for each agency.
- **Nationwide reach.** Contracts that serve public sector customers across the United States, including agency-specific agreements and Government-wide acquisition vehicles.
